

METAL ANNEALING FURNACES

SPECIFICATIONS SHEET

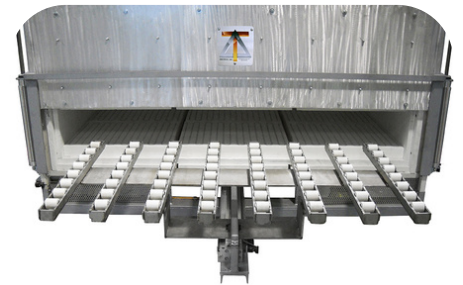

CERTIFIED:
ISO 9001:2015

**NUCLEAR QUALITY
ASSURANCE**
ASME NQA-1:2008

PRODUCT OVERVIEW

Need a low temperature furnace for isothermally annealing large footprint but thin metal items? Deltech will design a custom unit and control system that meets your specific application requirements. Shallow (150mm) workspaces, top and bottom heating elements, front and back guillotine doors, pneumatic or electric pushing apparatus, and ceramic roller hearths are examples of the kinds of features that are well suited for such applications. These furnaces can be batch or continuous.

Contact our Engineering team to start the design process.

We are renowned for our custom work.
